ALUVE OPTIMA

A luxurious and durable choice of high quality craftsmanship Aluminium Windows & Doors. Equipped with double-glass and thermal break system in a sleek design, The Optima Series helps saving energy, improves noise insulation, and ensure a long lasting performance & beauty.

Thermal Break System

The broken bridge structure create barrier between the inner and outer parts of the aluminum frame to reduce heat and cold from passing through, helping keep indoor temperatures comfortable and saving energy.

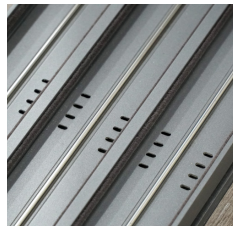

Profile Thickness:
1.8 - 5.0 mm

Double Insulating Glass

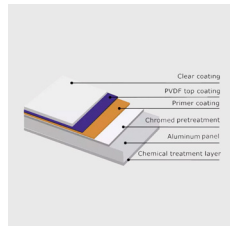

Double-insulating glass with Argon offers superior sound proofing and watertight performance, keeping your space quieter, drier, and more comfortable, no matter the weather or surroundings.

Hidden Drainage

Engineered with hidden drainage to channel rainwater discreetly, protecting your home from leaks, even in heavy downpours.

Fluorocarbon Color Coating

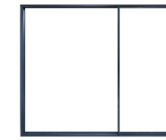

Fluorocarbon coating offers exceptional color stability and surface protection with long-lasting resistance to UV rays, weathering, corrosion, and harsh environmental conditions. Ideal for enduring architectural performance.
